Vision & Mission

STUDENT NUTRITION ASSOCIATION

PTAA Vision

Pioneer Technology & Arts Academy's (PTAA) vision is to create academically superior graduates who are ready to meet the challenge of global competition. PTAA believes that, as our students need to be competing and excelling at global level, it is important that they are :

- prepared,
- challenged and
- mentored

at the same level as well.

Exceptional Curriculum

PTAA's community-centered school will put extra emphasis on

- Engineering,
- Robotics and
- Computer Programming .

In addition, languages such as

- Mandarin and
- Spanish

will be taught at each aptitude level to give a competitive edge to the students.

The Latin Language will also be an elective subject. A foundation in Latin allows for an easier understanding of other languages.

Dual Credit College Courses

Currently PTAA has a MOA signed with UT Arlington TX and is currently working with Concordia University MN and Mayville State University ND to provide dual credit courses to PTAA students and allow students to graduate with an Associate Degree as well as a High School Diploma. PTAA's vision is to have involvement with several other colleges around the nation to provide a variety of choices to high school students.

Foreign Leadership Programs

PTAA high school students will also have an option to pick six months courses from Brazil, India and China (BRICS) nation countries. The primary focus of this program is to expose, challenge and mentor our students with their foreign peers in the fastest growing economies.

Nutritional Programs

PTAA believes the mental and physical health of a student is extremely

important to create an ideal classroom atmosphere. PTAA board members have been working on teaching the nutritional message in classrooms since 1990. PTAA strongly believes healthier kids are more focused and more attentive in the classroom, perform better on test & assessments, are absent less and exhibit more self-confidence.

Keeping TEXAS A Leader

PTAA's vision is to create and replicate this model in several Texas schools. Together we can make Texas scholars better prepared to face future challenges.
